❖ Organisational Chart

Global Tedarik & Çözümler
Global Procurement & Solutions

❖ The strengths of ESC

- Reliable Business Partner
- Competence & Technology
- Production Performance
- Perfection & Flexibility
- Satisfying the customer demands
- Network & Sources
- Quality Assurance & Control
- Customers
- Logistics & Delivery Performance

❖ Reliable Business Partner

▪ Reliable Business Partner

ESC has become the trustable partner for the industry as a result of the long time experience and direct contact to our local and international customers. This partnership is also based on close co-operation with reliable steel mills suppliers in Turkey, Europe and Far East , good teamwork and high standards steel processing to its customers.

❖ Competence & Technology

▪ Competence & Technology

As a steel service center of more than 100.000 mtons processing capacity and capability, experience and high-tech machinery park provides easy production at all stages of manufacturing and guarantees the exact satisfaction to our customers.

Our goal is to achieve the optimal efficiency for our customers.

❖ Production Performance

■ Production / Steel Processing (slitting & cut-to length) Performance

Using the latest technology in the fields of steel processing of slitting and cut-to length technology,

Computer and robot-aided manufacturing processes ensure constant performance and reliable production.

❖ Perfection & Flexibility

▪ Perfection & Flexibility

Customer demands the steel which perfectly fits to its production. This can only ensure when the slitting and cut-to length meets the specifications desired by the customers.

Every steel / coil / sheet processed in the facility/plant fulfils these high requirements.

Throughout World, ESC's service has been proved themselves to be a reliable business partner.

Global Tedarik & Çözümler
Global Procurement & Solutions

❖ Customer satisfaction

▪ Satisfying the customer demands

Despite our mechanised world, the human being is still the focal point of our business. To react quickly to customer demands requires not only a well-functioning logistics system but also flexible working processes. ESC employs a competent team of experts who work permanently on improving productivity. This is reflected above all in the reduction of production costs and delivery times.

The road to success lies on the basis of complete know-how and trust. The interaction between price and performance, and between quality and reliability is the guarantee for a satisfactory partnership. This is a road we wish to continue together with our customers.

❖ Network & Sources

▪ Network - System Integration

ESC promises quick response to all customers assured by reliable ERP & MRP system.

▪ Sources - ESC's Production Facilities

Turkey is a natural bridge between the Europe and Asia, and has located where the continents meet each other, which our country is the energy corridor and terminal between the Europe, the Central Asia and the Middle East. ESC has placed in Istanbul & Kocaeli (Izmit) where provides us easy access to the sources and customers since our location is the gateway to the Europe, the CIS-Commonwealth of Independent States , the Middle East, the North Africa, the Caucasus, Central Asia and Pan-Euro-Mediterranean Region.

ESC positively invests its sources in production facilities to improve its quality and productivity.

❖ Total Quality Management

ESC is realizing all needs of total quality management systems in each step of the production processes, environmental management, logistics and personal management in a very high standard.

- **DIN EN ISO 9001:2015 Quality Management Systems**
- **EN ISO 14001:2015 Environmental Management Systems**
- **BS OHSAS 18001:2007 Employee Occupational Health and Safety Assessment Series**

❖ Quality Assurance & Control

▪ Tests Equipments & Laboratory

ESC has already made all necessary arrangements to avoid dependability of any kind of customer demands on outsourcing and to reach %100 customer satisfaction. With these investments in last technical test machines and laboratory facilities ensure that our product and its production are under control permanently. We perform constant controls via test equipments of Kosgeb & own ;
